F512 / F8: full-degree binary sources
5-screen positive, 3-screen negative
Explicit stable transverse 5-torsion module
no evaluated elliptic torsion coordinates
Exclude geometric isogeny degrees 1..6
Frobenius distances and modular polynomials
Indecomposable principally polarized quotient
proved conditional implication
arithmetic Torelli
A genus-3 Jacobian for ONE source twist
existence theorem, twist not selected
Target equation and evaluated subgroup/log map
not constructed
