Cryptanalysis Lean source gate

Pinned 31 October tree: 184 tracked Lean files

97-source receipt + 77 further native checks + 10 tool-tree sources

- 90 archived byte-identical Lean source paths
- 7 fresh receipt Lean source paths
- 77 additional native Lean source paths
- 10 tool-tree Lean source paths

Hosted corpus job 41077865188 passed at 5939def0; its log ends with “native added theorem modules checked: 77”.
All 184 Lean path/blob IDs and 287 gate and dependency inputs match current d3673ee0.

Tool-tree group: 7 selftest examples, 2 audit modules, 1 TransferAudit source outside this corpus gate.

A native build and axiom gate checks source execution at pinned inputs. Theorem meaning and historical runs retain separate review obligations. Counts refer to source paths, not distinct scientific claims.
