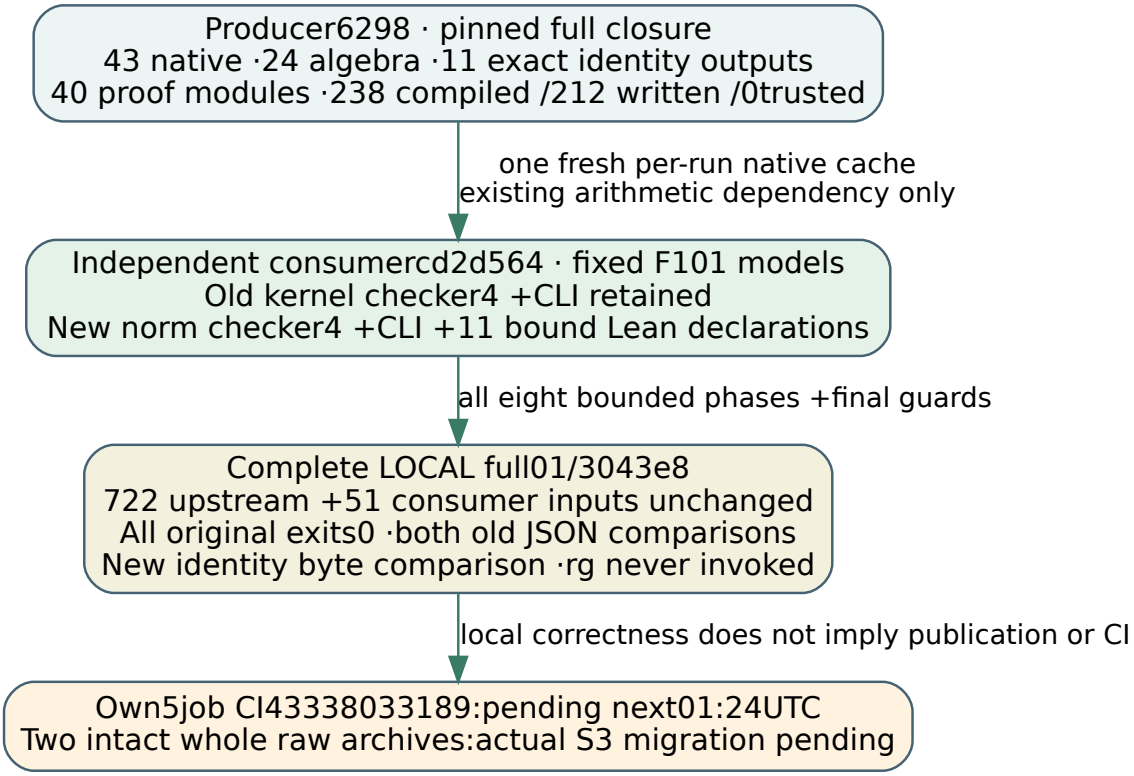
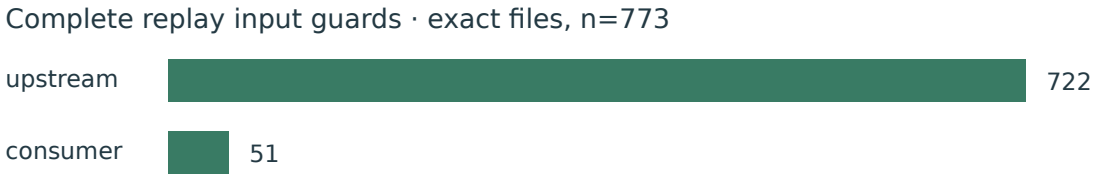
Complete independent prime-norm replay

Consumercd2d564 · producer6298 · complete LOCAL3043e8 · unsigned

Full01 passes43 native/24 algebra/eleven exact identity outputs/both old native JSON comparisons/40 upstream proof modules238 compiled212 written0trusted,old kernel checker4+CLI,new norm checker4+CLI+exact new identity bytes,and11 consumer Lean declarations/0trusted. [pcc:unverified]





All hashes unchanged;not timing or performance observations.

Original outerstart00:31:51Z/inner00:31:52Z/finish00:42:25Z on2026-11-13;outer+driverexit0,all8 phase pipe pairs[0,0],source/consumer/cleanliness exits[0,0,0]. The always-failing rg shim is never invoked. Source freeze ended only after original terminal and all guards. Unit durations are not cost or speed evidence. [pcc:unverified]

Custody, controls and remaining gates

All970 raw source/log/receipt/proof-output files form ONE2419924-byte standardtar.xz,SHA58462b62…fcd4a31. Member/raw/archive hashes and exact roundtrip are retained. Full191779-byte member JSON is losslessly compressed to40172-byte metadata,not a split raw tree. The separate unit archive is ONE206-file506588-byte original. Root handoff5643d0 copies both byte-exactly for actual trusted-base upload,whole remote replay and real manifest commits. Remote publication is pending at this checkpoint. [pcc:unverified]

Only one fresh per-run isolated native Cargo target serves producer and both checkers. Exact debug/release engine fingerprints and their full JSON are retained;no foreign preexisting binary. Runtime reuses existing arithmetic and balanced engines. Four new tests cover all12317 classes/complete222 rational target fibres;CLI remains a separate36-fibre bounded smoke check. [pcc:unverified]

Admissionb3f938	Actual result
Wrong upstreamHEAD5bec	Exit2 before allocation
Dirty new source	Exit2;restored byte-exactly
Dirty new identity certificate	Exit2;restored byte-exactly
Missinggrep	Exit2 before allocation

Static manifest101/correctedClippy02 are preserved7f58bd. Packaging01–04 retain the immutable Cargo EOF blank line,ignored-resume mixed-pathspec error,and quoted original whitespace diagnostics. Exact per-file generated-log rules preserve bytes;code whitespace gates remain. Governance05/a584bc passes ownc0b8 ledger/prose/workingcached checks and all194 current unit inputs. No mathematical native failure or criterion change. [pcc:unverified]

Producer6298 own43330431536 is settled SUCCESSall4/3e89b6,whole logs/API/XZ/hash/roundtrip retained. Consumer own5job43338033189/exactcd2d564 remains pending,next01:24UTC. Original35 inputs/four complete jobs stay byte-identical;fifth is additive. Full local replay,own CI and actual raw publication are separate obligations. [pcc:unverified]

Sources:protocolec2a8b,native204440,full3043e8,Lean380d2b,CLIfdd132,unitreport6c3a4e,Galbraith8.3.8/8.3.10,robfa422. See REPORT.md for full paths and SHA256 values. Eleven exact Lean bindings are partial geometry;global Picard/completion/jet/reducer/polarization bridges remain written/native. No signature,cost or solver advantage. [pcc:unverified]

Next:actual canonical raw migration/replay addendum checkpoints,then a separately frozen F101 C0↔T20 adapter comparison. Preserve all five jobs/sources and main ledger/review/archive/signing requirements. KB127/vault8edec422/S3checkpoint/livebudget gaps remain;no paid launch. [pcc:unverified]
