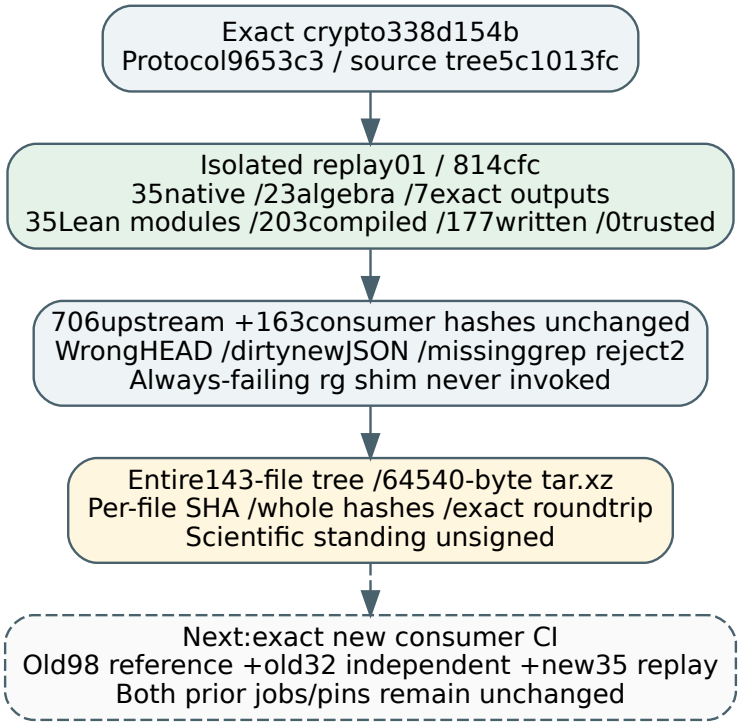
Complete isolated root338d replay

2026-11-12 · protocol9653c3 · all local criteria pass



Native35/algebra23 have zero failures,ignores or filters. All seven certificates replay byte-identically;35Lean modules produce203 compiled, 177written declarations and0trusted native. All706upstream+163consumer hashes stay unchanged. Receipt814cfc/root5efc28,scientific standing unsigned. The diagram records correctness coverage,not timing. [pcc:unverified]

Complete source and runner controls

WrongHEADfdfe,modified new cycle-first identity JSON and missinggrep all reject2 before outputs (1cab86). An executable rg shim always exits127, but is never invoked during the full positive replay. Separate source checkout and Cargo targets share only immutable Git object storage. The driver replays existing engines and Lean tools;it supplies no new independently invented verifier or scientific signature. [pcc:unverified]

Whole custody and preserved baseline

All119 run files plus whole transcript,times/status,guards/admissions/shim and9driver/pin/protocol/workflow snapshots form one143-file tree,archived as64540-byte standardtar.xz withper-fileSHA/raw+archiveSHA/exactroundtrip. All163 consumerinputs are hash guarded;unchangedRust content stays at immutablef656. No raw log is split or truncated. [pcc:unverified]

Old13Rust/check.sh/check-independent.sh/75a+0796pins and both old workflow jobs remain byte-identical. f656exactCI43246121013/f58004 succeeds;its closure report2a1fa3 and resolved problem join this new immediate1509child. Failed8f and all earlier lockfile/JSON/admission attempts stay preserved. [pcc:unverified]

Sources:root e60790/f04008/d67ccf,seven certificate records/six bindings, consumerV4/22ad5d andactualf58004logs. KB/atlas unavailable;exact sources are the fallback. The direct-bridge negative factor-stage comparison is retained. Fixed338d has no new whole Mumford maps;those remain root work. Rust1.99.1/Lean4.35.0,20minbound. Full source-linked report is PARTIAL_FROBENIUS_REPLAY_REPORT.md. [pcc:unverified]

Next:publish this concrete feature child and require its own exact-head CI of all three complete jobs. Scientific signing,ledger/C merges and admitted cost comparisons remain separate. No paid run or benchmark launched. [pcc:unverified]
