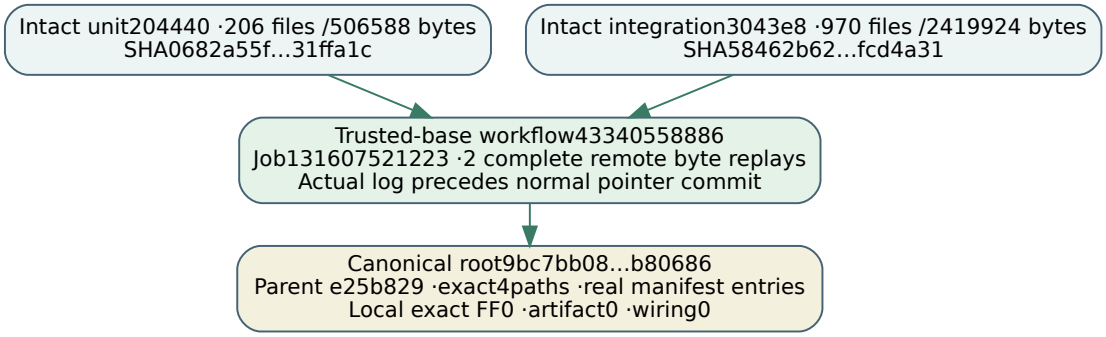
Whole prime-norm archives:actual publication

Rootb83ad3 · canonical9bc7bb08 · source science6298/cd2d564 · unsigned

The trusted-base workflow43340558886/job131607521223 records TWO complete remote objects re-played before the normal bot pointer commit. Exact9bc7bb08b2465603cbaaf6648e85dd2568b80686 has parent e25b829 and only four manifest/ignore/removal paths. Local exact FF,artifact check and workflow wiring all return0. Scientific standing remains unsigned. [pcc:unverified]



Canonical manifest at immutable root9bc7 records unit506588 bytes/SHA0682a55f…31ffa1c and full2419924 bytes/SHA58462b62…fcd4a31. Full hashes,object keys and source-linked workflow/manifest are in adjacent REPORT.md. The original206/970-file trees,source/log/startfinish/exit/guards/member/raw/archive hashes and exact roundtrips remain intact. No raw split/prune or policy/label/credential change. [pcc:unverified]

The complete425929-byte UTF8 workflow log is retained as one43276-byte standardXZ with raw/archive hashes and exact roundtrip. All26 API/command/log/receipt files are also one59400-byte standardtar.xz with every member hash and exact roundtrip. Followup43340658241 is a no-op,not upload evidence. Original pending handoff5643d0/089e7e is preserved and additively superseded for availability. [pcc:unverified]

Archives are report evidence,not replay runtime inputs. Consumer references the canonical root objects without changing any of its five jobs. Complete local3043e8 still passes43native/24algebraeleven/both-JSONcmp/40modules238compiled212written0trusted/oldkernel4CLI/newnorm4CLI/consumer11Lean/all722+51guards/original0/no-rg. Own consumer5jobCI43338033189 is pending,next01:24UTC. Scientific6298 CI3e89b6 remains settledall4;metadata-only pathfilter does not trigger a redundant focused run. No signature,cost or solver advantage is inferred. [pcc:unverified]
