Seventeen-position 140−τ nearest-digit recoding
scalar k
secp256k1 GLV lattice
17 steps
π = 140 − τ, norm 19,183
minimum-norm digit
with exact residue / tie rule
six-unit orbit seeds
3,198 digit + 3,677 terminal
signed point contributions
accumulate 17 positions + terminal
fixed-base point
independent binary replay
Native retained table: 4,178,836 bytes
96-pass qualified panels: 18-vs-17 and 16-vs-17
